

Education Opens Doors equips students with vital college and career knowledge

Preparing middle schools students to be college and career ready is a challenging undertaking. Between high school pathway selection, the college application process, and ever-changing workforce needs, districts need a program that provides students with the knowledge and skills that lead to post-secondary success.

Built by teachers, for teachers, Education Opens Doors provides districts and their teachers a comprehensive, standards-aligned curriculum that gives students and their families critical information about post-secondary planning. The curriculum is engaging and relevant, with real-world examples and connections to different industries and career opportunities.

The EOD program has been carefully crafted and intentionally designed to provide a frictionless college and career advising experience for teachers and their students, enabling schools to optimize their strategic visions for making their students college and career ready.

Empower Students

Empower students to make their own path through a diverse selection of post-secondary path options, including lengthy discussions of technical schools, entering the workforce, joining the military, and more.

Create Opportunities for Students

Provide students the resources and instruction to leave the program with a resumé, cover letter, budget, examples of professional communication, career research and a high school plan.

Expose Students to New Information

Introduce students to new content, teacher modeling, group discussion and partner exploration. Each lesson also concludes with exit tickets and extension opportunities.

Engage Students in their Learning

Challenge student thinking with a variety of assessments and classroom discussions that focus heavily on the higher tiers of questioning and focus on Bloom's Taxonomy as a guide.

Product Overview

The Education Opens Doors program has been thoughtfully built with robust curriculum relevant to students and their families, with the ultimate goal of giving students the ability to create a clear path for their futures and build a path to being college and career ready.

Digitized Curriculum

Focuses on every student's diverse selection of post-secondary path options - going beyond 4-year colleges to include lengthy discussions of technical schools, entering the workforce, joining the military, and more.

District-specific Customized Lessons

Option for two lessons to be customized specifically for your district, inclusive of precise information related to the district and the workforce needs of the community.

Assessments & Surveys

Formative assessment and student surveys provide opportunities for differentiation within the content, which exposes students to information about diverse college, career, and technical paths.

Data Analysis & Reporting

Educators gain deeper insights into student progress and make informed decisions. Our reporting tools provide real-time data, enabling educators to track student performance across learning objectives.

Comprehensive Teacher Training

Teachers receive an in-depth training of the content, the implementation plan, CCMR resources and tools, and best practices and trends in college and career advising.

Flexible Implementation

Schools and teachers have ownership about how best to fit the program into their own needs. It's designed to accommodate a variety of settings and pacing needs.

Ongoing Teacher Support

Our team offers comprehensive implementation support for teachers throughout the program to ensure successful adoption of the curriculum.

Optional SEL Lessons

Students are provided opportunities for self reflection, problem-solving and conflict management strategies, and meaningful practice applying new skills.
